

I have been listening to satellite radio and its traffic and weather channels since they were available to me. Satellite radio provides me with the variety and quality of programming that is absolutely not available elsewhere. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear.

I respectfully urge the FCC to reject the NAB's petition 04-160 and support XM Radio's ability to provide the kind of programming that I demand and deserve as a consumer.
